Dome mirror 90° and 180°

BM 90

BM 180

Application Indoor use	Material Acrylic or polycarbonate	Fixing Chain / Ceiling	Warranty 2 Years
---------------------------	--------------------------------------	---------------------------	---------------------

Due to the 360° overview, our globe mirror is recommended for surveillance in industrial areas. It helps to prevent accidents on ways where forklift trucks are circulating or in production areas.

It can be fixed by chains or directly screwed on the ceiling.

Our globe mirrors 90° and 180° give a global overview in T-junctions and similar hazardous areas. These mirrors make the traffic movements in workplaces visible and reduce the chances of industrial injuries. The mirrors are placed directly on the wall or ceiling.
